

LEVEL MEASURING WITH MAGNETIC GAUGE

www.aramakco.com

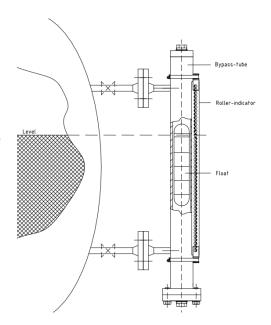

Introductions

The ARAMAK magnetic liquid level gauge used to determine the volume of liquid contained within a tank. Because the magnetic level high pressure applications and hazardous locations are protected from the danger of a chemical spill due to glass failure.

The magnetic level gauge made in 2 Type:

- 1- Economical
- 2- Heavy duty

Applications

Typical industries:

- Oil and gas production
- Petrochemical
- Chemical
- Power generation
- Water and wastewater treatment
- Food and beverage
- Pharmaceutical
- Pulp and paper
- Biotech
- Semiconductor

Typical applications:

- Oil
- Water
- High and low pressure separators
- Oil and water interface
- Acids hydrofluoric, hydrochloric, nitric, sulfuric, etc.
- Refined petrochemical gasoline, propane, butane, ethylene, etc.
- Solvents acetone, toluene, xy-

lene, naphtha

- Gas condensate
- Heat transfer fluids diathermy, thermion and glycol
- Black, green and red liquor
- Refrigerants
- Alcohols
- Caustics
- Chlorine
- Steam condensate boiler feedwater heater boiler drum level control
- Bitumen
- Vacuum tower bottoms
- Ammonia
- Liquid Sulphur
- Most liquid to liquid interfaces

Mounting Type

Side Mounted Magnetic Level Gauge

- Highly visible level indication with no process fluid in con-tact with the glass
- All construction in house by code certified welders
- Float designed and weighted for maximum accuracy
- Transmitter and switch options which can be installed, adjusted and maintained with no process interruption
- Safe for corrosive, flammable, toxic, hightemperature and high- pressure applications
- Rugged design- low or no maintenance

Top Mount Magnetic Level Gauge

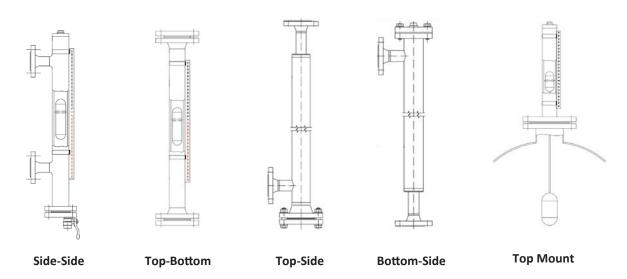

- Magnets above float connected with rod
- Slug catcher level
- Optional stilling wells
- Total or interface level measurement
- Underground tanks and sumps
- Fluids with magnetic particles
- Can be used with transmitters and switches

Corrosive/Lightweight Magnetic Level Gauge

- PVC, CPVC, Polypropylene or PVDF construction (for lightweight MLGs)
- Titanium, Monel and Hastelloy (for corrosive applications)

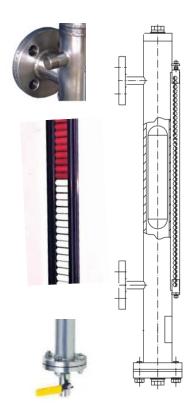

Heat Traced and High Temperature Insulation Magnetic Level Gauge

- Electrical or steam heat tracing
- Removable insulation

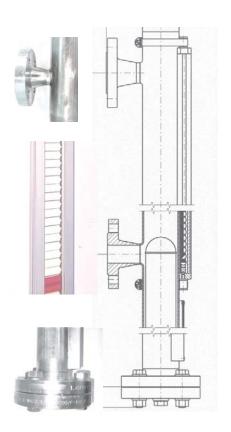

Typical Application

Economic

Standards

The magnetic level gauge made in 2 main type:

- 1- Economical
- 2- Heavy duty

Standards

- Measuring length: max. 6 m
- Operating temperature: T = -196 ... +450 °C -
- Operating pressure: P = vacuum to 200 bar
- Limit density: ρ ≥ 340 kg/m3
- Material: stainless steel 304, 316, Inconel
- Wide variety of different process connections and materials
- Explosion-protected versions
- Accuracy transducer: ±1 mm
- Option: transmitter 4 20 mA, contacts

Economic

- Measuring length: max. 6 m
- Operating temperature: T = -10 ... +180 °C -
- Operating pressure: P = vacuum to 30 bar(a)
- Material: stainless steel 304 or 316
- Limit density: $\rho \ge 340 \text{ kg/m}3$
- Accuracy transducer: ±1 mm
- Option: transmitter 4 20 mA, contacts

Accessories

Steam or electrical heat trace

Used to uniformly heat or cool process fluid Magnetic traps

Fits in line with process connection Also available in integral configuration Air purge for roller

Vibration Isolator Connections

Absorbs large amounts of vibration Eliminates signal distortion Recommended for use on compressor and pump skids

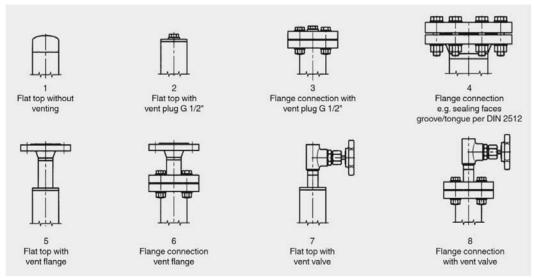

Oversized chambers

Used to uniformly heat or cool process fluid allows vapors to pass floats when a fluid is close to vapor pressure and can be used in fluids with small suspended particles. Also used in conjuction with Teflon S coating for non-stick.

High temperature insulation

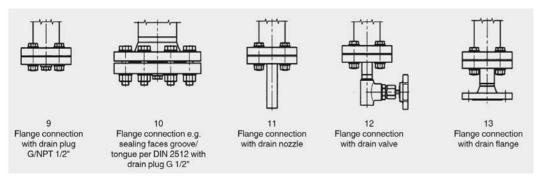

For extreme temperature environments, the ARAMAK magnetic level gauge is factory furnished/fabricated to offer high temperature insulation.
